PPALstore is an easy to install and use online shopping cart cgi script that passes all credit card sales to PayPal for processing while maintaining alternative payment methods.Easy configuration for additions and subtractions to the base product price. Any currency form is acceptable too. There are no complex installation requirements or modules to configure. Install using FTP, no tar files to telnet. PPALstore simplifies the process of accepting credit cards from your web site by submitting sales directly to PayPal. Version 1.2b fixes some small bugs to assure smooth, trouble-free operation and installation.
