

PRAjax - PHP Reflected Ajax - v1.2.1

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The PRAjax class can be used to reflect PHP code into JavaScript and Ajax methods and vice-versa. The following features make this library worth using: * Allows easier Ajax programming with PHP * PHP functions and objects can be reflected to JavaScript * PHP objects can be used in JavaScript, both properties and (registered) functions * PRAjax creates all wrappers for the developer The new updated version v1.2.1 offers a lot of improvements compared to the old version. Make sure you read the changelog!
