Preview Anywhere allows graphic designers, printers, sign companies, yellow pages, apparel & embroidery companies to have a user-friendly way for their clients to preview the artwork prior to production, without the difficulties of sending e-mail attachments or taking multiple trips across town to show the proofs for approval. Contractors login and create clients, upload items to proof, create folders for uploads and to seperate documents, and can even rename documents all within the interface Clients login and view the work and either approve the items or request changes be made., they can also upload examples and such All transactions are logged including client viewing, emails are sent both ways on all transactions Application uses the file system object to create folders and rename folders and files, all operations are took care of so there is no lack of communication, which can kill the print and graphic business Take test drive today!
