

## Print View (From a db template)

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Web pages usually print pretty lousy. Typically, background colors are not displayed (unless you change the browser settings) and depending on site the width may be set much wider than the printer can handle on the horizontal for an 8 ½ page. Providing a printer friendly format adds immeasurable value for your users. This example demonstrates how to strategically place a couple of simple tautologies that will display banners and other items in the typical or “default” view and allows a link back to the same page with a querystring value that will be used to suppress everything but the db output.
