

# PrO Protect

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is a Perl script that will stop all brute force cracking after 3 attempts. The aggressive human is now blocked from your protected area for 30 minutes, then he / she can try again. Please give it a try by trying to access the protected areas more than 3 times. Just guess the password 3 times or more. This script will send you an email report when someone is trying to hack your protected area.
