

Process payment with Paypal IPN

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This package can be used to submit and process payments with Paypal Instant Payment Notification system. It provides a base class for submitting payments and handle Paypal responses. Applications should create a sub-class of this base class to override a few functions to customize the details of the payment transactions and how the payment responses should be handled.
