Professional Active Server Pages 3.0 is the next edition of the number one selling ASP book in the world; Professional Active Server Pages 2.0. This is a next edition covering all the new features that appear as part of Win2000 but it is also a completely new book in terms of content, recycling essentially nothing from the previous edition. Instead all the concepts are taken a step further for a more mature audience and ASP is considered in terms of an N-tier enterprise environment including extensive coverage of components, Index Server, ADO 2.5, XML, CDO, ADSI, and much more.
