

Progress Report Manager v. 2.1

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Progress Report Manager was built to alleviate problems experienced with traditional school Progress Reports. Using the Internet, administrators create Progress Reports that are automatically sent via email. Every week, teachers receive a message in their inbox reminding them that a new Progress Report has been created. The teacher completes the Progress Reports online using a web browser. At the end of the week, the administrators click a button which sends email messages to every parent whose child received a report. The parents can look at their students progress online and reply to teacher comments using response features. This latest version is a significant enhancement over previous versions. Help files are now very thorough and admin functionality more comprehensive.
