

Property rental script - source code

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Real time availability check and real time bookings. Clean and sales oriented, easy to customize templates. Multiple language support allows you to receive bookings from anywhere in the world. Simple to use script management section where you can handle all major features implemented into the script: multiple currencies, multiple languages, additional property description fields, taxes, additional services which can be offered to your clients and many more. Revenue sources for the script owner: advertising packages or commission on bookings. Property owners can manage their properties using the Property Management Area: enter property descriptions, upload unlimited images, define pricing and ratecard for each property, define the selling points for each property, manage the bookings and booking enquiries, associate taxes and additional services they offer to their customers and much more ...
