Email	{value_email}

Proxy Sites have taken the internet by storm, with literally thousands of web-based proxies now available online. Privacy is a really big issue on the internet, resulting in web-based proxies becoming increasingly popular. Our script helps you cash in on this "niche" market, by providing you with a proxy link indexing script, that allows you to create a huge listing of the many web based proxies on the internet. Proxy site owners submit to be listed on your site. By default listings are free, but you can cash in on this market by offering paid premium listings. A great example of a site benefiting tremendously from this market is proxy.org. This site makes thousands literally per month from proxy site owners who are looking to promote their proxy site. Our script gives you the opportunity to create a similar site.
