

# PunyURL

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This class can be used to create short URLs using Puny sapo.pt Web services API. It can send an HTTP request to services.sapo.pt Web services API to create a short URL for another given URL. The class can also do the opposite, i.e. get the original URL associated to a previously created short URL.
