Query Grid

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This control lets the casual user intuitively ad-hoc query a data set. It is recommended as a simple alternative to multiple query criteria and result screens. In this single control, the developer has everything s/he needs to rapidly make data queryable from .NET for any type of user.
