Mobile Number	{value_mobile_number}
Email	{value_email}

Quick Recovery Incredimail is a non-destructive, simple and easy to use data recovery software, supports all types of media viz. EIDE, IDE/ATA, WDC, SCSI, iSCSI, SATA, PATA, Micro Drives, DigitalMedia, etc., having .IMH and .IMB file formats: Incredimail support, multi-disk and multi-lingual support, simulates previously existing partitions and is read-only i.e. the program will never attempt to write to the drive to recover. Its unique Guided File Excavation Technology (GFETch) helps in locating email files and folders lost behind overwritten partitions and even if bad sectors hinder drive access. An exhaustive scan of the drive is performed to locate lost e-mails. The recovered mail file can be imported/ read directly in Outlook Express, thus covers all recovery cases encountered since 1993.
