Quick Recovery Linux (ReiserFS) is a non-destructive, simple and easy to use data recovery software, supports IDE, EIDE, SCSI , SATA drives, long file name having multi-disk and multi-lingual support, partition in dual booting disk support, simulates previously existing partitions and is read-only i.e. the program will never attempt to write to the drive to recover. Its unique Guided File Excavation Technology (GFETch) helps in locating files and folders lost behind overwritten partitions and even if bad sectors hinder drive access. An exhaustive scan of the drive is performed to locate lost volumes. It search heuristics help locate partitions and folders quickly and recovers data from damaged Super Block, lost Login password, damaged/ deleted/corrupted volimes/initialised disks, virus attack, disk crash, accidental formating and creating different file system, missing/ corrupted Operating System or software failure, lost partition, missing drives, and even from crashed Linux drives.
