Quick Recovery Lotus Notes Server is a non-destructive, simple & easy to use data recovery software, supports all types of media viz. EIDE, IDE/ATA, WDC, SCSI, iSCSI, SATA, PATA, Micro Drives, DigitalMedia, etc., having Lotus Notes Domino 6.0 and above support, multi-disk and multi-lingual support, simulates previously existing partitions and is read-only i.e. the program will never attempt to write to the drive to recover. Its unique Guided File Excavation Technology (GFETch) helps in locating files and folders lost behind overwritten partitions and even if bad sectors hinder drive access. If data gets lost due to virus attack, disk crash, accidental files/folders deletion, accidental formatting and creating different file system, missing Operating System or software failure, lost partition, missing drives, registry corruptions, file corruption, etc., cause a business disaster then Quick Recovery is the best solution to rescue because it covers almost all recovery cases encountered
