

QuiXplorer - web-based file-management

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

QuiXplorer is a multi-user, web-based file-manager. It allows you to manage and/or share files over the internet, or an intranet. The latest version provides the following functionality: * Browsing directories; showing names, file sizes, file types, modification times and permissions * Copying, moving and deleting files * Searching for files and directories * Uploading and downloading files * Editing text files * Creating new files and directories * Changing file permissions. In multi-user mode: * Users are authenticated. * Administrators can manage users. * Each user has his/her own settings. QuiXplorer is currently available in English, Dutch, German, French, Spanish and Russian.
