A free open source project that aims to design and develop a Multiplayer Online Role Playing Game (i.e. mmorpg). The game is based on popular Ogre3D rendering engine and the CEGUI library. All processes from design to development are community-oriented through the use of a wiki and a focus on collaboration, allowing anyone to contribute. The in-development C++/Ruby based game and server are both fully open-source, licensed under the GNU General Public License.
