

Random image script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Use this script to show a random image from a folder of your choice. Works with any file type so it can be used as a random file download script as well. Supports filtering files by extension, modifying settings on-the-fly using query string and can be used inside other PHP scripts by using PHP include.
