<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Randomage is a random image generator. It supports 3 graphics types; .png, .gif, and .jpg. It finds a random image from your pics directory, figures out what type it is, prints the content header based on that type, and then displays the picture. All automatically. It can be called via tag or via SSI. It's your choice. :)
