Rapid Deployment URL Launcher

Address Contact Person Mobile Number Email

{value_address}
{value_contact_person}
{value_mobile_number}
{value_email}

Rapid Deployment is a simple freeware tool that allows you to create and launch a customized list of regularly visited urls in separate default browser windows with only one click. Webmasters and anyone who surfs a great number of web sites should find Rapid Deployment useful. Besides opening all of your favorite url's, Rapid Deployment can also open windows programs if you input the path.
