As-you-type and dialog spell checker for ASP.NET & MVC web applications. Whether you're developing internet software using Web Forms or MVC, RapidSpell Web ASP.NET provides a simple but powerful spell check component that your end-users will love to use. Adding a spell check option to your textual controls using RapidSpell is as simple as adding 2 script tags to your page. With inline, as-you-type or dialog spell checking interfaces at your disposal and an open API, you will find RapidSpell Web ASP.NET is fully capable of fitting in to your web application and meeting business demands. Multiple non-English dictionaries are available including Medical and Legal. 5 English variations are included with the product.
