RapTier is a C#, VB.NET and SQL Code Generation tool that helps you build powerful and robust database-driven .NET applications quickly and easily. You will: Cut down your development time by more than half; Shrink your testing time; Have fully-functional applications in minutes; The uniqueness of RapTier is in its template-based structure that gives you a total control over the way the code is generated. Simply modify RapTier templates and have custom output for all your applications. And that's not all. The generated applications are flexible and easily extendable to meet your specific development requirements.
