

Reading & Updating Content of a file

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script shows an example of a counter being incremented every time the page is loaded. This is achieved by reading a file line by line using the fgets function and extracting the 2 fields (one for the date one for the counter). The file is then being updated. There is a live example.
