

## ReaJpeg - image converter to Jpeg

Address {value\_address}

Contact Person{value\_contact\_person}Mobile Number{value\_mobile\_number}

**Email** {value\_email}

Combine batch image conversion from any format to JPG with plenty of image editing operations. For example, you can resize a folder of images with different extension to half the original size, rotate, change colors, rename, crop, make borders, and save in JPG - all in a single step. It can be easily integrated to shell so you can work on your images right from Windows.
