

Real-time Web Site Analyzer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Web Analyzer shows charts and graphs of who is on your web site right now, where they came from, and what pages they are viewing. After you add some simple javascript code to your web page, then you can immediately look at your website visitor statistics. Web Analyzer doesn't use SQL, and no relation with System weblog of Apache or IIS. Web Analyzer software is a powerful real-time website analysis tool that you own, therefore you do not pay a monthly fee.
