Reciprocator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Reciprocator is a neat script that will allow you to keep track of where people come from to your site - even if you don't have access to standard log files. This script can be called either with SSI or as a picture. All links are shown decreasingly, based on their hits, along with a notification if a hit was generated today.
