Mobile Number	{value_mobile_number}
Email	{value_email}

Recruiting Parser is a application that has been in development for a year. Major Features * over 25 case-insensitive different tags * incredibly easy set up * automatic correction for badly formated tags * protection against tags that would cause page crash * protection against spam-robots (mails get crypted) * 16 different smilies bundled * deparse function - parse and deparse how many times you want * built-in updates - check if a newer version is available, whenever you want * open code * reprogrammable & extensible That's it! You get all that, in just one file sized ~60 KB.
