<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Need a way to see if you IM service is online or offline, well this is the script. You can tell if you AOL Instant Messenger Screen Name, Yahoo! Instant Messenger Screen Name, or ICQ Number is ONLINE or OFFLINE at anytime of the day. You can set it up so that you can have more than one screen name working with the same code. Used with [IMG][/IMG] and MySpace.com

For more details, please visit <http://scripts.goclix.com/redim-26644>
