

# Redirect a web browser Using JavaScript

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

In this article we are going to learn how to redirect a web browser using JavaScript. Why web browser redirect is necessary? Do Your Pages Look The Same on All Browsers? Probably not! The same page seen on each different browser can have a different look. If you maintain separate pages for Netscape and Internet Explorer browsers and want to additionally divide each browser's page into version pages, this script is for you. There are some other reasons
