

Redirect function with permanent 301 redirect support

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

An example of simple function `ae_redir()` for HTTP redirect. It supports relative site paths and permanent(seo-compatible) redirects. There is also function `ae_redir_die()` which stops execution of script after sending redirect.
