

Remote Scripting With JavaScript and ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Remote scripting is an extremely powerful feature available in both Netscape Navigator and Internet Explorer. It allows us to use a combination of scripting languages to call server side ASP code from the client using JavaScript. This article shows us how to install remote scripting as well as two examples of using it to interact with ASP scripts using client-side JavaScript code.
