

Remove Common Words from Search String

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Before sending the user given search string to MySql, its a good idea to remove common words used in it so that it may not disturb any relevant results you have in your DB. Their are far more professional approaches out there for this task but this simple one helps often.
