# Remove ^M's

**Address**                                {value_address}

**Contact Person**                    {value_contact_person}

**Mobile Number**                   {value_mobile_number}

**Email**                                    {value_email}

The purpose of this script is remove those pesky control M character's (^M) off of the end of your scripts after you have edited them in DOS or Windows.
