

Restaurant Booking System by StivaSoft

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Interactive restaurant reservation system for your website. Created and fully supported by PHPjammers & Stivasoft, the restaurant booking system provides a self-serviced booking system for your website and powerful availability management tools. With this restaurant reservation system you can easily embed a powerful table booking system on your website and start accepting reservations online. You can manage table availability, restaurant working hours, users access, etc. using an user-friendly admin panel. Using the admin you can select to charge deposit fee for reservations to confirm booking, customize the reservation form, send auto confirmation emails and text messages , add a multilanguage support on the front-end. You can test the system out and try all admin options at PHPjammers.com, a fully featured demo is available for you. With a single copy you can use the restaurant booking system 2.0. on an unlimited number of websites. Developer License is available!
