Revisited: Logging With PHP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

In this continuation of the article, "Logging With PHP," the author explains how to build a PHP/MySQL-driven Web traffic logging and analysis system that can be continually updated, which provides information on what content was being viewed, browser and platforms stats, and trends over time. This system is currently being used on SourceForge.net.
