

# Rotating Banner Ads using a Database

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This tutorial shows how to create a simple Ad rotation system based on ASP-SQL Server combination. All Ad info (except images, which are asumed to be in current directory) is stored in SQL server table caled Banners. The system is intended to provide easy random rotation and counting of Ad showing and clicks.
