A free PHP script, converts RSS feeds to HTML. Users can create webpages that will always display the most current information from the RSS feed, and because the resulting page is pure HTML, it will be in a format friendly to search engine robots. Using rss2html.php webmasters can customize the format and look of the web page created from the feed. The RSS feed's contents can easily be integrated into an existing website's theme. The rss2html.php
