<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The RTF-to-HTML DLL .Net is a robust and independent .Net assembly to convert Text, RTF documents into HTML/XHTML documents with CSS. The component is 100% created in managed C# and absolutely standalone. It does not require MS Office or any other word-processor. The component offers full formatting support, allowing you to retain various formatting options from your original RTF files. This includes support for font styles, faces and sizes.
