

SA PHP Framework

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

SA PHP Framework is a full application stack which implements the Front Controller Pattern. Originally written for PHP4 was fully rewritten to take advantage of the PHP5 object model. It features "search engine friendly URLs", page events, validity checking for the GET parameters and it's tightly integrated with Smarty.
