Mobile Number	{value_mobile_number}
Email	{value_email}

If you sell digital products via PayPal, Safe-T-Lock Pro is for you. Safe-T-Lock Pro is a secure e-delivery system for digital products. It harnesses the power of PayPal's IPN system, allowing you to provide instant order fulfilment via email - without you having to lift a finger. Your product remains safe within a .htaccess protected directory, and its location is never revealed for others to share around. Safe-T-Lock Pro can now manage all of your products via a slick admin interface. Features include anti-fraud mechanisms, dual-posting mode for live and test sales, integrated PayPal button generator, custom button styles, configurable email templates, template-driven success & cancel pages, customer newsletter integration, activity stats, multi-currency support, edit/delete customer details and more. Safe-T-Lock Pro is a complete product management system for online sellers who don't want or need the hassle of shopping cart software.
