Scintilla's WWW Access Counter

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This counter counts the number of accesses to a certain page. This is done by refering to a program in /cgi-bin/(usually called script) which increases the counter and returns a picture of the current value. So each access to a HTML page results increases this counter.
