Scrape Web Site - Create Graph or Chart

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Use this free online tool to scrape a web site and produce a graph. The tool will access the web site you specify and look through the resulting HTML. It looks for HTML tables and if table number is set, will ignore any encountered, up until the table number is reached. Label column specifies which column to take the label from and Data column, which one to take the values from.
