

## Scrollable menu links

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

If you have a lot of menu links and not a lot of space, this is the script to turn to. It compacts any content into a predefined area, with the content accessible via scrolling. Browsers other than IE 4+ or NS 4+ will simply see nothing.
