## Search engine domain position PHP Script

Address Contact Person Mobile Number Email {value\_address}
{value\_contact\_r

{value\_address} {value\_contact\_person} {value\_mobile\_number} {value\_email}

With this tool, you can specify a list of domains and it will check their position within the search results for a specific keyword combination. This way you can easily compare how your competition ranks for your keywords. This tool supports Google, MSN and Yahoo search engines.
