Search engine keyword position check PHP Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

his great PHP script checks the position of your website in search engines for several keywords at once. Just enter your list of keywords, choose the search engine to check with (Google, MSN and Yahoo are supported) and within a few seconds you will get your website's position.
