Search Engine Redirector

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script lets visitors at your site search the web by selecting from a list of search engines. It also has the option to log what people are searching for on each site. You will need the HTML code containing the form and engine.cgi. The urls and titles for each engine are hidden in the SELECT tag of the form. This way you can easily add more in the future.
