Mobile Number	{value_mobile_number}
Email	{value_email}

Search Maker Pro is a Windows-based software that will create a single HTML file which is a self contained search engine. By simply placing this HTML file on your website, anyone will be able to search your site. The search engine is professional looking and fully customizable (including frames support). NO access to a server is required so the engine will work on any site, or even offline (for hard disk, CD or DVD use).
