SearchHippo HTTP XML web search API

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This simple snippet allows you to interface with the SearchHippo web search engine's http xml api. You must have expat compiled in to use this snippet. You can layer mostly any presentation around the results that come back. This is very similar to how one might use SOAP.
