

SearchToSale

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows you to put a search box on your site, and then redirect the visitor to a URL that you have specified for that search term. Originally developed for sending visitors to affiliate programs based on search terms, also great for navigation or any other purpose. Allows setting a default url in case no search term is matched. Easy to install, and easy to administer. Ideal for small site search index, or large site to redirect visitors to paying urls. Advanced version also available (\$39.95) that allows an additional option (like JS, display gif, etc, anything a browser would recognize) plus logging of search terms.
