

Secure Login

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Secure Login is a password protection application for your templates. Users are assigned access levels (such as Administrator, Manager, etc.) and when the user logs in, his access level determines what pages he is allowed to see. You can even use this system to show different areas of content on the same page to different levels of users. App comes with an Access database and an administration section for managing the database. Very easy to setup and you can use your own header/footer to customize the look the way you like.
